Academic Projects

Title : Video Streaming Platform
Platform : Hybrid Programming **Duration** : 1 Month
Description : Developed a full-stack Video Streaming Platform using Java, Spring Boot, React.js, and MySQL, enabling users to browse, search, and stream videos across multiple categories. Implemented Spring Security with JWT-based authentication and role-based authorization for secure access. Developed RESTful APIs for subscription management, watch history, likes, search history, premium content access, and personalized recommendations. Designed and implemented an Admin Dashboard for managing users, video content, categories, and subscriptions. Built the application using a layered architecture with Spring Data JPA, Hibernate, and REST APIs, ensuring scalability, maintainability, and efficient database operations.

Title : DONATE AT YOUR FINGERTIPS
Platform : Android Programming **Duration** : 3 Months
Description : Developed an Android-based donation management application using Java, Kotlin, Android Studio, XML, Firebase, and Google Maps API. Implemented user authentication, donation posting, recipient request management, real-time notifications, and GPS-based location tracking. Integrated Google Maps API for location-based donation matching and utilized Firebase for authentication, cloud data storage, and real-time synchronization. Designed a responsive, user-friendly interface to streamline the donation process, reduce resource wastage, and improve accessibility for food, clothing, and book donations.
